

PROJECT PROFILE: Widnes Alstrom Train Depot

PROJECT SPECIFICATIONS

Status:	Completed
Started:	July 2020
Completed:	August 2020
Project Duration:	3 weeks
Client:	CBRE
Location:	Widnes
Discipline:	Installation Of Security Fencing

ABOUT THE PROJECT

Sunville Rail were awarded works to install 256m new boundary fence using the approved Eclipse-60 system and to also carry out remedial works to repair tarmacked area at Alstrom's Widnes Train Depot.

PROJECT OVERVIEW

The new Eclipse fencing was manually delivered to various areas around the depot and installed along the perimeter fence at the agreed locations to increase security at the train depot and limit external access.

Over a 3 week period 256m of eclipse 60 system fencing was successfully installed as per project time scheduling.

Remedial works to tarmacked area involved the cutting and breaking out the existing tarmac to flatten out the foundations and install new tarmac and tarmac waste removed and disposed of.

This project was completed in a timely manner and to the client's satisfaction.
