

PROJECT PROFILE: Culmers Walkway

PROJECT SPECIFICATIONS

Status: **COMPLETED**
Started: August 2021
Completed: November 2021
Project Duration: 3 Months
Client: Murphy's
Location: Culmers
SVR Disciplines: Walkway construction, Routeworks, Access, Vegetation clearance, Site Clearance

ABOUT THE PROJECT

As Part of our continued support to our client Murphy's, Sunville Rail Limited teams have been carrying out work in the Kent area doing a fantastic job creating safe access to sites, for our NR maintenance colleagues and future improvement projects. This project profile is an example of work carried out the access site of Culmers.

PROJECT OVERVIEW

Sunville Rail were awarded works to clear vegetation and install a new safe walking access route from access Gate to TP hut at Culmers.

Walkway was installed using GRP grating, GRP handrail and plastic lumber to ensure a sturdy, durable and long-lasting safe walking route for access.

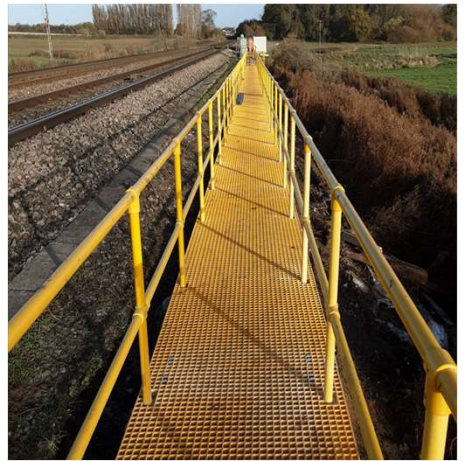

- Works carried out by Sunville include;
- Install GRP Walkway and Handrail
- Vegetation clearance works
- Secure Chainlink fencing
- Site clearance
- Routeworks
- Safe access to track paralleling hut
- Install new Access Gate
- Create and install access gate signage
